

AL FERRO PUTRA YUSANDA

Full-Stack Web Developer | Generative AI / NLP Engineer

(+62) 877-4549-4074 | alferroputra1313@gmail.com | [linkedin.com/al-ferro-putra-yusanda](https://www.linkedin.com/al-ferro-putra-yusanda) | github.com/Ferituaku

PROFESSIONAL SUMMARY

Cumlaude Computer Science student (GPA 3.60/4.00) at Universitas Diponegoro with hands-on experience across full-stack web development (Next.js, React, TypeScript, Flask) and applied NLP/Generative AI (IndoBERT, LangChain, extractive summarization). Shipped production features for internship, university, and freelance-agency projects spanning dashboards, AI chatbots, and e-commerce platforms. Completed an undergraduate thesis on extractive multi-document summarization using Sentence-BERT and Maximal Marginal Relevance (graduated June 2026). Comfortable owning a feature from UI to API to model integration.

EDUCATION

Universitas Diponegoro — B.Sc. Informatics / Computer Science Aug 2022 – Jul 2026
Faculty of Science and Mathematics, Semarang, Indonesia | GPA: 3.60/4.00 (Cumlaude)

SMA Negeri 3 Salatiga — Science Aug 2019 – Aug 2022
Salatiga, Indonesia

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, PHP, Java
Frontend: Next.js, React, Tailwind CSS, Framer Motion, GSAP
Backend & APIs: Node.js, Flask, REST API design, Prisma ORM, Laravel
AI / NLP / ML: IndoBERT, Sentence-BERT, LangChain, Extractive Summarization (MMR), NER, scikit-learn, pandas
Data & Infra: MySQL, PostgreSQL, Cloudflare R2, Railway, n8n (workflow automation), Git/GitHub, Linux/Shell
Other: OBS/Streamlabs live production, Adobe Premiere Pro & Photoshop, Canva, CapCut

CERTIFICATIONS & TRAINING

- Alibaba Cloud Certified Associate – Cloud Computing — Alibaba Cloud (Valid through Nov 2026)
- Build Intelligent Agents Using DeepSeek & N8N — Coursera / Board Infinity (Feb 2026)
- Building Applications with DeepSeek — Coursera / Board Infinity (Feb 2026)
- ICP Web3 Workshop (Smart Contract Deployment) — ICP HUB Indonesia (April 2024)

WORK EXPERIENCE

Software Engineer Intern — PT Astra International Jan 2025 – Mar 2025
North Jakarta, Indonesia

- Built a full-stack monitoring dashboard (Next.js + Python Flask REST API) giving the Generative AI & RPA division real-time visibility into project status and logs across 7 active projects, cutting manual status-reporting effort.
- Designed wireframes and reusable UI components, translating stakeholder requirements into a clean, maintainable component library used across the dashboard.
- Integrated frontend with backend REST endpoints end-to-end, coordinating directly with GenAI/RPA engineers on data contracts and log formats.

Machine Learning Laboratory Assistant — Universitas Diponegoro Sep 2025 – Nov 2025
Department of Informatics, Semarang

- Mentored 20+ students through the full ML workflow — EDA, feature engineering, model training, and evaluation (accuracy, precision, recall, confusion matrix) — using Python, pandas, and scikit-learn.
- Graded assignments and ran review sessions explaining model-selection trade-offs, improving students' evaluation-metric literacy.

Operating System Laboratory Assistant — Universitas Diponegoro Oct 2024 – Nov 2024
Department of Informatics, Semarang

- Led hands-on Linux labs (shell navigation, file/permission management, process and package management) for undergraduate CS students.
- Designed practical exercises and quizzes, and provided 1:1 troubleshooting during lab sessions.

Additional Experience

- **Publication & Documentation Coordinator, POSITIF 2023** — Led visual branding, content strategy, and on-site coverage for HMIF's annual sports/arts/esports festival (Mar–May 2023).
- **Audio Video Event Technician, HMIF Universitas Diponegoro** — Operated live streaming/broadcasting and LED videotron for official university events (Dec 2023).

FEATURED PROJECTS

Cahaya Silver (Silver King by CAI) — Full-Stack Developer Oct 2025 – Dec 2025

- Built a dual-interface luxury e-commerce platform (Next.js, TypeScript, Prisma ORM) with a customer storefront and an admin management console for precious-metals inventory.
- Implemented a gold-authenticator scanner feature and integrated Cloudflare R2 for CDN-backed asset delivery, deployed on Railway.
- Owned UI/UX for product catalog and authentication flows using Framer Motion and GSAP for high-end motion design.

WASKITA — Full-Stack Developer (ORMAWA StopHIVa FKM UNDIP) Jul 2025 – Oct 2025

- Developed an end-to-end HIV/AIDS educational platform (Next.js 15) with articles, gamified quizzes, and role-based authentication with email verification.
- Built a LangChain-powered AI chatbot orchestrated via n8n, enabling secure, anonymous real-time health consultations.
- Collaborated with public-health stakeholders to scope features; the project secured university-level funding (PPK Ormawa 2025).

SIT (Sistem Informasi Terpadu) — Fullstack Developer Juni 2024

- Built an integrated information system for Informatics IRS students using Laravel, covering scheduling and student-data workflows end to end.

RESEARCH / THESIS

Undergraduate Thesis (Skripsi) Graduated Jun 2026

“Peringkasan Multi-dokumen Ekstraktif Menggunakan Metode Sentence-BERT dan Maximal Marginal Relevance pada Teks Berita Online Bahasa Indonesia”

English title: Extractive Multi-Document Summarization Using Sentence-BERT and Maximal Marginal Relevance for Indonesian Online News Text

- Designed and implemented an extractive multi-document summarization pipeline for Indonesian online news using Sentence-BERT embeddings to represent sentence-level semantics.
- Applied Maximal Marginal Relevance (MMR) for sentence selection to balance relevance and redundancy across multiple source articles.
- Evaluated the system on a case study covering multi-document coverage of Indonesia's Minister of Finance appointment, benchmarking output against reference summaries using ROUGE metrics.
- Successfully defended the thesis and completed the undergraduate program, Department of Informatics, Universitas Diponegoro (June 2026).

ORGANIZATION EXPERIENCE

- **Arts and Sports Staff, HMIF Universitas Diponegoro** (Aug 2023 – Nov 2024) — Produced digital assets for division events and managed live broadcast operations (OBS/Streamlabs) for esports tournaments.
- **Member, GDSC Universitas Diponegoro** (Mar 2023 – Feb 2024) — Participated in workshops and study jams on web, mobile, and ML fundamentals.
